Contents of Volume 78

Number 1, 7 May 1979

DE ORTIZ, C. Z., The Selective Permeability of Sodium and Potassium Channels in Nerve: Orbital Control Hypothesis 1

WEISS, L. and NIR, S., On the Mechanisms of Transfilter Induction of Kidney Tubules 11

ITZKOWITZ, M., On the Organization of Courtship Sequences in Fishes 21

BRUSKOV, V. I. and POLTEV, V. I., On Molecular Mechanisms of Nucleic Acid Synthesis. Fidelity Aspects: 2. Contribution of Protein-Nucleotide Recognition 29

FISEN, M., MACRI, N. and MEHTA, J., Microfluorometry Analysis II. A Bayesian Approach 43

MCCABE, M., ASAM, K. and MAGUIRE, D., The Effect of Temperature upon the Combined Diffusional and Kinetic Parameters of Tissue Respiration 51

SUMMERTON J., Sequence-Specific Crosslinking Agents for Nucleic Acids: Design and Functional Group Testing 61

SUMMERTON, J., Intracellular Inactivation of Specific Nucleotide Sequences: A General Approach to the Treatment of Viral Diseases and Virally-mediated Cancers 77

ORR, J. S., Continuous Administration of Short-lived Radioisotope Tracers and the Analogous Laplace Transform 101

VON HEIJNE, G. and BLOMBERG, C., The Concentration Dependence of the Error Frequencies and Some Related Quantities in Protein Synthesis 113

HASTINGS, H. M. Stability Considerations in Community Organization 121

ICHIKAWA, M. and CHOU, T-W., Analysis of Deformation and Contraction in Cylindrical Crystals Due to Dispirations or Dislocations 129

RUDIN, D. O., The Second Cell Membrane: The Basal Lamina and the Tissue Cell Theory of Metazoa 143

Number 2, 21 May 1979

BERMAN, S. A. and HANLON, S., Comparison of the Linear Least Mean Squares Procedure and the Vector Projection Method of Spectral Analysis 167

CALDER, W. A., III., On the Temperature-Dependency of Optimal Nectar Concentrations for Birds 185

OTTO, P., SEEL, M., LADIK, J. and MÜLLER, R., From Retrospective to Predictive Structure Activity Correlations 197

DANCIS, B. M. and HOLMQUIST, G. P., Telomere Replication and Fusion in Eukaryotes 211

CALHOON, R. E. and AARONSON, S., A Discriminate Analysis of Amino Acid Frequency in Collagen-like Proteins 225

IURIÉ, D. and WAGENSBERG, J., Non-equilibrium Thermodynamics and Biological Growth and Development 241

IRIMAJIRI, A. HANAI, T. and INOUYE, A., A Dielectric Theory of "Multi-Stratified Shell" Model with its Application to a Lymphoma Cell 251

EPSTEIN, I. R., Competitive Coexistence of Self-Reproducing Macromolecules 271

LETTERS TO THE EDITOR

ELDER, D., BUdR and the Quantal Mitosis: A Cleavage Plane Shift Model 299

BRILL, M. H., Further Features of the Illuminant-Invariant Trichromatic Photosensor 305

Number 3, 7 June 1979

STAYTON, M. M. and FROMM, H. J., A Computer Analysis of the Validity of the Integrated Michaelis–Menten Equation . . 309

DALY, M., Why Don't Male Mammals Lactate? 323

APLIN, P. S. and HILL, D. J., Growth Analysis of Circular Lichen Thalli 347

KEMBER, N. F., Proliferation Controls in a Linear Growth System: Theoretical studies of cell division in the cartilage growth plate . 365

SERBA, F., A Surface-Chemical Basis for Cell Motility . . . 375

ANDREWS, P. R. and HEYDE, E., A Common Active Site Model for Catalysis by Chorismate Mutase-Prephenate Dehydrogenase . 393

MCELWAIN, D. L. S., CALCOTT, R. and MORRIS, L. E., A Model of Vascular Compression in Solid Tumours 405

GLABE, C. G., A Supramolecular Theory for Specificity in Intracellular Adhesion 417

LEWIS, J. and WOLPERT, L., Diploidy, Evolution and Sex . . . 425

LETTERS TO THE EDITOR

MIYANISHI, K., HOY, A. R. and CAVERS, P. B., A Generalized Law of Self-thinning in Plant Populations (Self-thinning in Plant Populations) 439

BOYER, J. F., The Terminology of Markov Chains . . . 443

ORLOVE, M. J., Putting the Diluting Effect into Inclusive Fitness . 449

Number 4, 21 June 1979

TSUKAMOTO, Y., An Information Theory of the Genetic Code . . 451

HUNTER, S. A., MOEURA, R. A., CRUSBERG, T. C. and HARVEY, R. J., Bond Graph Simulation of Skeletal Muscle Glucose Metabolism 499

SHUTER, B., A Model of Physiological Adaptation in Unicellular Algae 519

TRAVIS, C. C. and POST, W. M. III., Dynamic and Comparative Statics of Mutualistic Communities 553

HO, M. W. and SAUNDERS, P. T., Beyond neo-Darwinism—An Epigenetic Approach to Evolution 573

MCNAIR, J. N., A Model of Tentacle Function in Certain Suctorians . 593

Index to Volume 78

AARONSON, S. (see CALHOON, R. E.), 225
Adaptation, physiological, in unicellular algae, a model of, 519
Adhesion, intracellular, a supramolecular theory for specificity in, 417
Algae, unicellular, a model of physiological adaptation in, 519
Amino acid frequency in collagen-like proteins, a discriminate analysis of, 225
ANDREWS, P. R. and HEYDE, E., A common active site model for catalysis by chorismate mutase-prephenate dehydrogenase, 393
APLIN, P. S. and HILL, D. J., Growth analysis of circular lichen thalli, 347
ASAM, K. (see MCCABE, M.) 51

Basal lamina and tissue cell theory of metazoa; the second cell membrane, 143
Bayesian approach to microfluorometry analysis, 43
BERMAN S. A. and HANLON, S., Comparison of the linear least mean squares procedure and the vector projection method of spectral analysis, 167
Birds, on the temperature-dependency of optimal nectar concentrations for, 185
BLOMBERG, C. (see VON HEIJNE, G.), 113
Bond graph simulation of skeletal muscle glucose metabolism, 499
BOYERS, J. F., The terminology of Markov chains (letter), 443
BRILL, M. H., Further features of the illuminant-invariant trichromatic photosensor (letter), 305
BRUSKOV, V. I. and POLTEV, V. I., On molecular mechanisms of nucleic acid synthesis. Fidelity aspects: 2. Contribution of protein-nucleotide recognition, 29
BUdR and the quantal mitosis: a cleavage plane shift model (letter), 299

CALCOTT, R. (see MCELWAIN, D. L. S.), 405
CALDER, W. A., III., On the temperature-dependency of optimal nectar concentrations for birds, 185
CALHOON, R. E. and AARONSON, S., A discriminate analysis of amino acid frequency in collagen-like proteins, 225
Cancers, virally-mediated, and viral diseases, a general approach to the treatment of; intracellular inactivation of specific nucleotide sequences, 77
Cartilage growth plate, theoretical studies of cell division in; proliferation controls in a linear growth system, 365
Catalysis by chorismate mutase-prephenate dehydrogenase, a common active site model for, 393
CAVERS, P. B. (see MIYANISHI, K.), 439
Chorismate mutase-prephenate dehydrogenase, a common active site model for catalysis by, 393
CHOU, T.-W. (see ICHIKAWA, M.), 129
Cleavage plane shift model: BUdR and the quantal mitosis (letter), 299
Collagen-like proteins, a discriminate analysis of amino acid frequency in, 225
Communities, mutualistic, dynamic and comparative statics of, 553
Community organization, stability considerations in, 121
Competitive coexistence of self-reproducing macromolecules, 271

Courtship sequences in fishes, on the organization of, 21
Crosslinking agents, sequence-specific, for nucleic acids: design and functional group testing, 61
CRUSBERG, T. C. (see HUNTER, S. A.), 499
Crystals, cylindrical, analysis of deformation and contraction in, due to dispirations or dislocations, 129

DALY, M. Why don't male mammals lactate?, 323
DANCIS, B. M. and HOLMQUIST, G. P., Telomere replication and fusion in eukaryotes, 211
DE ORTIZ, C. Z., The selective permeability of sodium and potassium channels in nerve: orbital control hypothesis, 1
Dielectric theory of "multi-stratified shell" model with its application to a lymphoma cell, 251
Diffusional and kinetic parameters, combined, of tissue respiration, the effect of temperature upon, 51
Diluting effect: putting it into inclusive fitness (letter), 449
Diploidy, evolution and sex, 425
Dispirations or dislocations, analysis of deformation and contraction in cylindrical crystals due to, 129

EISEN, M., MACRI, N. and MEHTA, J., Microfluorometry analysis II. A Bayesian approach, 43
ELDER, D., BUdR and the quantal mitosis: a cleavage plane shift model (letter), 299
Epigenetic approach to evolution—beyond neo-Darwinism, 573
EPSTEIN, I. R., Competitive coexistence of self-reproducing macromolecules, 271
Error frequencies and some related quantities in protein synthesis, the concentration dependence of, 113
Eukaryotes, telomere replication and fusion in, 211
Evolution, diploidy and sex, 425
Evolution, an epigenetic approach to; beyond neo-Darwinism, 573

Fishes, on the organization of courtship sequences in, 21
Fitness, inclusive, putting the diluting effect into (letter), 449
FROMM, H. J. (see STAYTON, M. M.), 309
Fusion and replication, telomere, in eukaryotes, 211

Genetic code, an information theory of, 451
GLABE, C. G., A supramolecular theory for specificity in intracellular adhesion, 417
Glucose metabolism of skeletal muscle, bond graph simulation of, 499
Growth analysis of circular lichen thalli, 347
Growth and development and non-equilibrium thermodynamics, 241
Growth system, linear, proliferation controls in; theoretical studies of cell division in the cartilage growth plate, 365

HANAI, T. (See IRIMAJIRI, A.), 251
HANLON, S. (see BERMAN, S. A.), 167
HARVEY, R. J. (see HUNTER, S. A.), 499
HASTINGS, H. M., Stability considerations in community organization, 121
HEYDE, E. (see ANDREWS, P. R.), 393

HILL, D. J. (see ALPIN. P. S.), 347
HO, M. W. and SAUNDERS, P. T., Beyond neo-Darwinism—an epigenetic approach to evolution, 573
HOLMQUIST, G. P. (See DANCIS, B. M.), 211
HOY, A. R. (see MIYANISHI, K.), 439
HUNTER, S. A., MOEURA. R. A., CRUSBERG, T. C. and HARVEY, R. J., Bond graph simulation of skeletal muscle glucose metabolism, 499

ICHIKAWA, M. and CHOU, T-W., Analysis of deformation and contraction in cylindrical crystals due to dispirations or dislocations, 129
Illuminant-invariant trichromatic photosensor, further features of (letter), 305
Information theory of the genetic code, 451
INOUYE, A. (see IRIMAJIRI, A.), 251
Intracellular inactivation of specific nucleotide sequences: a general approach to the treatment of viral diseases and virally-mediated cancers, 77
IRIMAJIRI, A., HANAI, T. and INOUYE, A., A dielectric theory of "multi-stratified shell" model with its application to a lymphoma cell, 251
ITZKOWITZ, M., On the organization of courtship sequences in fishes, 21

KEMBER, N. F., Proliferation controls in a linear growth system: theoretical studies of cell divisions in the cartilage growth plate, 365
Kidney tubules, on the mechanisms of transfilter induction of, 11

Lactation in male mammals, why doesn't it occur?, 323
LADIK J. (see OTTO, P.), 197
Laplace transform, analogous, and the continuous administration of short-lived radioisotope tracers, 101
Least mean squares procedure and the vector projection method of spectral analysis, comparison of, 167
LEWIS, J. and WOLPERT, L., Diploidy, evolution and sex, 425
Lichen thalli, circular, growth analysis of, 347
LURIÉ, D. and WAGENSBERG, J., Non-equilibrium thermodynamics and biological growth and development, 241
Lymphoma cell, a dielectric theory of "multi-stratified shell" model with its application to, 251

MCCABE, M., ASAM, K. and MAGUIRE, D., The effect of temperature upon the combined diffusional and kinetic parameters of tissue respiration, 51
MCELWAIN, D. L. S., CALCOTT, R. and MORRIS, L. E., A model of vascular compression in solid tumours, 405
MCNAIR, J. N., A model of tentacle function in certain suctorians, 593
MACRI, N. (see EISEN, M.), 43
Macromolecules, self-reproducing, competitive coexistence of, 271
MAGUIRE, D. (See MCCABE, M.), 51
Male mammals, why don't they lactate?, 323
Mammals, male, why don't they lactate?, 323
Markov chains, the terminology of (letter), 443
MEHTA, J. (See EISEN, M.), 43
Membrane, second cell: the basal lamina and the tissue cell theory of metazoa, 143

Metabolism of skeletal muscle glucose, bond graph simulation of, 499
Metazoa, the basal lamina and the tissue cell theory of; the second cell membrane, 143
Michaelis-Menten equation, integrated, a computer analysis of the validity of, 309
Microfluoremetry analysis: a Bayesian approach, 43
Mitosis, quantal, and BUdR: a cleavage plane shift model (letter), 299
MIYANISHI, K., HOY, A. R. and CAVERS, P. B., A generalized law of self-thinning in plant populations (self-thinning in plant populations) (letter), 439
Model, cleavage plane shift: BUdR and the quantal mitosis (letter), 299
Model, common active site, for catalysis by chorismate mutase-prephenate dehydrogenase, 393
Model, "multi-stratified shell": a dielectric theory with application to a lymphoma cell, 251
Model of physiological adaptation in unicellular algae, 519
Model of tentacle function in certain suctorians, 593
Model of vascular compression in solid tumours, 405
MOEURA, R. A. (see HUNTER, S. A.), 499
Molecular mechanisms of nucleic acid synthesis. Fidelity aspects: contribution of protein-nucleotide recognition, 29
MORRIS, L. E. (see MCELWAIN, D. L. S.), 405
Motility of cells, a surface-chemical basis for, 375
MÜLLER, R. (see OTTO, P.), 197
"Multi-stratified shell" model: a dielectric theory with application to a lymphoma cell, 251
Muscle, skeletal, glucose metabolism, bond graph simulation of, 499
Mutualistic communities, dynamic and comparative statics of, 553

Nectar concentrations, optimal, for birds, on the temperature-dependency of, 185
Nerve, the selective permeability of sodium and potassium channels in; orbital control hypothesis, 1
NIR, S. (see WEISS, L.), 11
Nucleic acid synthesis, molecular mechanisms of; fidelity aspects: contribution of protein-nucleotide recognition, 43
Nucleic acids, sequence-specific crosslinking agents for; design and functional group testing, 61

Orbital control hypothesis; the selective permeability of sodium and potassium channels in nerve, 1
ORLOVE, M. J., Putting the diluting effect into inclusive fitness (letter), 449
ORR, J. S., Continuous administration of short-lived radioisotope tracers and the analogous Laplace transform, 101
OTTO, P., SEEL, M., LADIK, J. and MÜLLER, R., From retrospective to predictive structure activity correlations, 197

Permeability, selective, of sodium and potassium channels in nerves; orbital control hypothesis, 1
Photosensor, illuminant-invariant trichromatic, further features of (letter), 305
Physiological adaptation in unicellular algae, a model of, 519
Plant populations, self-thinning in; a generalized law (letter), 439

POLTEV, V. I. (see BRUSKOV, V. I.), 29
POST, W. M. III. (see TRAVIS, C. C.), 553
Potassium and sodium channels in nerve, the selective permeability of; orbital control hypothesis, 1
Proliferation controls in a linear growth system: theoretical studies of cell division in the cartilage growth plate, 365
Protein synthesis, the concentration dependence of the error frequencies and some related quantities in, 113
Protein-nucleotide recognition; on molecular mechanisms of nucleic acid synthesis. Fidelity aspects, 29
Proteins, collagen-like, a discriminate analysis of amino acid frequency in, 225

Quantal mitosis and BUdR: a cleavage plane shift model (letter), 299

Radioisotope tracers, short-lived, continuous administration of, and the analogous Laplace transform, 101
Replication and fusion, telomere, in eukaryotes, 211
Respiration, tissue, the effect of temperature upon the combined diffusional and kinetic parameters of, 51
RUDIN, D. O., The second cell membrane: the basal lamina and the tissue cell theory of metazoa, 143

SAUNDERS, P. T. (see HO, M. W.), 573
Second cell membrane: the basal lamina and the tissue cell theory of metazoa, 143
SEEL, M. (see OTTO, P.), 197
Self-reproducing macromolecules, competitive coexistence of, 271
Self-thinning in plant populations, a generalized law (letter), 439
Sequences, specific, of nucleotides, intracellular inactivation of; a general approach to the treatment of viral diseases and virally-mediated cancers, 77
SERBA, F., A surface-chemical basis for cell motility, 375
Sex, diploidy and evolution, 425
SHUTER, B., A model of physiological adaptation in unicellular algae, 519
Skeletal muscle glucose metabolism, bond graph simulation of, 499
Sodium and potassium channels in nerve, the selective permeability of; orbital control hypothesis, 1
Specificity in intracellular adhesion, a supramolecular theory for, 417
Spectral analysis, comparison of the linear least mean squares procedure and the vector projection method of, 167
Stability considerations in community organization, 121
STAYTON, M. M. and FROMM, H. J., A computer analysis of the validity of the integrated Michaelis-Menten equation, 309
Structure activity correlations, from retrospective to predictive, 197
Suctorians, a model of tentacle function in, 593
SUMMERTON, J., Intracellular inactivation of specific nucleotide sequences: a general approach to the treatment of viral diseases and virally-mediated cancers, 77
SUMMERTON, J., Sequence-specific crosslinking agents for nucleic acids: design and functional group testing, 61

Supramolecular theory for specificity in intracellular adhesion, 417
Surface-chemical basis for cell motility, 375

Telomere replication and fusion in eukaryotes, 211
Temperature effect upon the combined diffusional and kinetic parameters of tissue respiration, 51
Temperature-dependency of optimal nectar concentrations for birds, 185
Tentacle function in certain suctorians, a model of, 593
Thalli, circular lichen, growth analysis of, 347
Thermodynamics, non-equilibrium, and biological growth and development, 241
Tissue respiration, the effect of temperature upon the combined diffusional and kinetic parameters of, 51
Transfilter induction of kidney tubules, on the mechanisms of, 11
TRAVIS, C. C. and POST, W. M. III., Dynamic and comparative statics of mutualistic communities, 553
TSUKAMOTO, Y., An information theory of the genetic code, 451
Tumours, solid, a model of vascular compression in, 405

Vascular compression in solid tumours, a model of, 405
Vector projection method and the linear least mean squares procedure of spectral analysis, comparison of, 167
Viral diseases and virally-mediated cancers, a general approach to the treatment of; intracellular inactivation of specific nucleotide sequences, 77
VON HEIJNE, G. and BLOMBERG, C., The concentration dependence of the error frequencies and some related quantities in protein synthesis, 113
